

About the Company

EGO Translating Group of Companies (founded in 1990) is one of the leaders on the linguistic market of Russia, and one of top three linguistic services providers of Eastern Europe according to Common Sense Advisory, an international independent agency. The Group includes *EGO Translating Company CJSC*, *EGO Translating Company LLC*, *EGO Translating SB LLC*, and *EGO Translating University ANPO CPE*.

The Group provides a broad range of services in translation and interpreting into 99 world languages, legalization and notarial certification of documents, localization of websites and software, corporate foreign language training, text layout and design; consulting in intercultural communication, development of software. The portfolio of the Group includes more than 2,000 major projects in 50 industries.

Structural divisions of the Group specialize in provision of the following types of services:

- *EGO Translating Company CJSC* – written translation of documents on any subject and in any area; localization services; simultaneous and consecutive interpreting (linguistic support at business events, negotiations, international transaction management, contract supervision and equipment setup and fine-tuning);
- *EGO Translating Company LLC* – translation and legalization of official documents for individuals and legal entities;
- *EGO Translating SB LLC* – comprehensive linguistic support of defense sector enterprises. The company is the only translation company on the market with its own Classified Information Management Department, whose activities have been certified by the Federal Security Service of the Russian Federation and the Federal Service for Technology and Export Control of the Russian Federation.
- *EGO Translating University ANPO CPE* – corporate training in foreign languages, linguistic audits of company personnel.

A key advantage of the EGO Translating Group of Companies is that the company provides a full range of linguistic support services for projects of any degree of complexity in any industry. This approach was made possible by the Group's taking a client-oriented approach, using cutting-edge translation and project management technologies, hiring a professional team of translators, proofreaders, editors, teachers and trainers, and project managers, and extensive expertise with more than 350 specialized glossaries in different languages and on different topics, a continuous system of quality control and high level of services.

The technological solutions used in implementing the projects – a comprehensive project management system, CAT tools – computer-assisted translation and term memory tools, an online training system, a cloud platform for simultaneous interpreting, etc.

Full-time and part-time company employees who work on the projects are carefully selected. They complete a series of tests, and later complete a series of in-service training sessions, developing their professional competencies in the following areas: translation of specialized texts, working with dictionaries, working with translation software (CAT programs), post-editing of machine translation, working with various graphic editors, etc.

The Group has developed the following software: EGO Frequency Dictionary – a tool that monitors precise and sequential use of terminology, ET QA Term – a patented program that checks and restores sequential use of terminology in the translated text using the in-built software product, the QA system that monitors quality and checks whether the translated text contains any errors.

The Quality Management System of the linguistic services provider has been certified as compliant to the requirements of international standards ISO 9001:2015 and ISO 17100:2015.
